Preliminary Assessment

April 2, 1992

Response to USEPA comments:

Preliminary Assessment

[1] A table of contents is provided.

PA Score

[2] The distance to the probable point of entry of the nearest surface water body is 3200 feet as stated on page 12 of the PA Scoresheet and on pages 18 & 23 of the Preliminary Assessment.

[3] The unnamed stream is considered a perennial stream, not an intermittent stream, which is also stated on pages 18 & 23 of the Preliminary Assessment.

[4] The wetlands apply to the unnamed perennial stream, therefore the scores should remain the same.

[5] General - The PA score should remain the same.
